The qualities of the Wavefront W2 have established its success as a powerful stand-alone system. This switchable active/passive two-way cabinet uses specialist high power drive units to achieve maximum SPL's from a very compact enclosure.

It combines smooth, dynamic full frequency performance with exceptional articulation for a portable stand-alone system. Designed to meet the industry requirement for a 12" (300mm) driver plus horn configuration, Martin Audio's version is more refined for superior, professional results.

architectural and engineering specifications

The loudspeaker system shall be of the two-way switchable active/passive type consisting of one 12" (300mm) direct radiating reflex loaded low frequency transducer and one 1" (25mm) exit HF compression driver mounted on a constant directivity horn in a trapezoidal plywood enclosure. The enclosure shall be fitted with an integral pole mounting socket and threaded inserts for wall and ceiling mounting. Active or passive operation shall be selected by a switch at the rear of the enclosure. In active mode the loudspeaker shall be bi-amped and operated with a separate electronic controller. In passive mode, low and high frequency sections shall be integrated by an internal 1.5kHz passive crossover network.

Performance of the loudspeaker system with its electronic controller shall meet or exceed the following criteria:

Frequency response measured 1 metre on axis shall be 60Hz-18kHz $\pm$ 3dB.

High frequency dispersion at -6dB points shall be 70°H x 40°V.

Power handling shall be 300W AES, 1200W peak (LF/HF), 60W AES, 240W peak HF

Rated impedance shall be 8 ohms LF/(LF+HF), 8 ohms HF.

Maximum SPL measured at 1 metre on axis shall be 122dB continuous, 128dB peak.

Dimensions (W) 365mm x (H) 554mm x (D) 364mm (14.4ins x 21.8ins x 14.3ins).

Weight 24kg (53lbs).

The loudspeaker system shall be the Martin Audio W2.
